

Dear Parents/Guardians,

27 Oct 2011

4th, 5th, & 6th class have almost completed their free trial in the Mathletics Programme. This programme has been so successful we would like to run this throughout the school, Senior Infants to 6th class. This is a powerful learning tool, which has recently been adapted to the Irish Mathematical curriculum. It provides online learning, with detailed tutorials, on the core concepts of the Maths Curriculum. It monitors a student's individual progress and charts his/her attainment. It offers tutorial in areas where the individual is experiencing difficulty and stretches all to expand learning. Students will be assigned 10 minutes of Mathletics as part of their nightly homework. We appreciate that some students will not have access to the internet at home, and where possible your child will access Mathletics at school.

As Mathletics is designed to cover the complete Maths Curriculum, from Junior Infants to 6th year in secondary school (Leaving Cert), age 5 – 18, you may find it useful to get an annual family membership when your child transfers to second level. The cost of 24/7 access to this programme for your child for 12 months is €6. Please send in this amount before Friday 28th Oct and your child's username and password, hopefully, will be processed before the Halloween break.

The Resource team will assist to set your child up on the programme as soon as possible. For classes who are not familiar with this programme, please log on to the website www.mathletics.ie or contact us with any queries.
