

# Preparing a Fine Tilth and Sow the Seeds

## Gardening Card 5

In this card we are giving you few tips about sowing wether it is in rows, pots or for large spaces like grass or wild flowers areas.

- Fork over soil without bending over and putting pressure on your back.
- Rake the surface even careful not putting piles at the edges.
- Tread the surface to remove pockets of air (gardeners shuffle).
- Rake again to make it even
- Sow seeds either in rows or for wildflowers plant half in one direction and half in the other.
- Rake over gently to cover seeds and protect from birds.
